

About Us

Serving you and our community since 1991

It has been our pleasure to serve this community for years. Since the very beginning we have dedicated ourselves to being knowledgeable about heating and air conditioning products, to bring you quality installations that comply with local codes and courteous, friendly service after the sale. We're committed to meeting your comfort equipment needs and to keep your system running reliably and efficiently for years and years.

We are particularly proud of providing heating and air-conditioning systems that have earned the Good Housekeeping Seal. It's one more assurance that, when you choose York products and Don West Cooling & Heating, you're choosing quality.

We're your first choice to meet your indoor comfort needs.

Venting Gas Appliances

With today's gas appliances, we are faced with the potential of **major liability** for vents that experience poor draft, corrosion failure, condensate leakage causing damage to walls and ceilings, condensate damage of the appliance and leakage of flue gases.

The level of risk is increased due to the fact that these problems may go undetected at the time of installation.

Corrosion is a slow process that may not become evident for two to three years. During this time, far too many improper installations could lead to a series of vary costly failures.

Carbon Monoxide poisoning

Collapsing Chimneys

Fire Hazards

Non conformance with building codes

Your heating and cooling professional

- Licensed, Insured and Code Compliant
- Professional installers
- Complete installations and retrofits
- Experienced HVAC professionals dedicated to quality
- Professional consultants - timely estimates
- Service after the sale

Don West

Started Don West Cooling and Heating in 1991 after attending classes at Johnson County Community College. Became Block Certified as a Master Mechanic and returned to teach nine semesters as an Adjunct Instructor for Johnson County Community College. While there Don taught Basic Principles of HVAC, Equipment Selection and Duct Design and Installation and Startup. Don currently serves on the Advisory Board for the HVAC department.

Don has taught classes for Johnson County Contractor Licensing, the local chapter of the Air-conditioning Contractors of America and the Heart of America chapter of the International Code Council on the proper venting of Gas Appliances.

It's time to get comfortable.
